Japanese Patent No. 3732490

What is "Napure Mirror"?

The mirror reflecting the real color of your skin as seen by others
The most suitable mirror for matching the colors of your skin and a foundation and for partial makeup

Glass of high clarity + Reflective metal layer by vacuum deposition =

"Napure Mirror" reflects natural pure colors with minimum change.

Glass of high clarity

The glass used for the conventional mirrors contains considerable amount of iron to absorb blue light of the incident light and make white color look dull. We have developed "Napure Mirror" made of clear glass with minimum iron content. "Napure Mirror" rarely changes the reflected colors to show natural and pure colors without influence by the glass. Thus "Napure Mirror" is the most suitable for matching the foundation to the colors of your skin and partial makeup.

Napure Mirror (in our test)

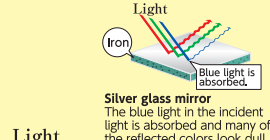

Cross section of Napure Mirror
Reflects real color of human skin with minimum color change.

Conventional silver glass mirror (in our test)

Cross section of the mirror
White color is reflected into slightly yellowish white and other colors are reflected colors look dull.

Comparison in reflection (in our test)

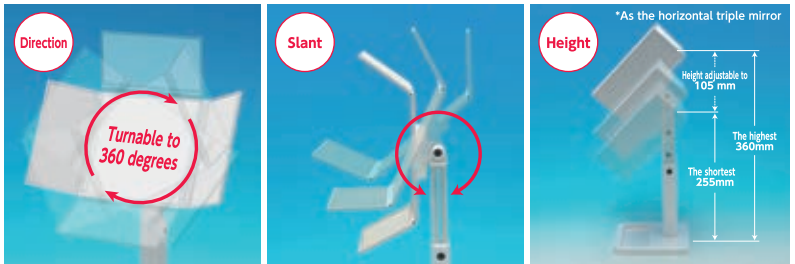

Light
Iron
Blue light is absorbed.
Silver glass mirror
The blue light in the incident light is absorbed and many of the reflected colors look dull.

Light
Napure Mirror
