

"Napure Mirror" is a high-class mirror more excellent than others and reflects the real color of your skin as seen by others.

Do you think that the conventional mirrors reflect real color of your skin?

Actually, the color of your skin reflected by the conventional mirrors is slightly different from the color seen by other people.

The conventional mirrors do not reflect the real color of your skin.

The conventional mirrors have failed to correctly reflect the color of your skin. The mirrors reflect white color into slightly yellowish white and make other colors dull. So your face looks pale.

And makeup with a conventional mirror may cause troubles, for example !

mismatch of the colors between your skin and a foundation,

too much rouge on your cheeks, and

too much eye shadow.

... because of incorrectly reflected colors !

"Napure Mirror", on the contrary, reflects the real color of your skin,

more naturally and beautifully than any other mirrors do. The correctly reflected color of your skin enables you to apply makeup with properly selected colors.

The items of "Napure Mirror" have been employed as the training aids by Tokyo Beauty Advisor School.

The instructors and trainees praise the mirrors with the message, "The mirrors clearly reflect the color of human skin and are the best makeup items."

This is the feature of the gloss and reflection of the patented "Napure Mirror".

Glass of high clarity

Reflective metal layer by vacuum deposition

"Napure Mirror" reflects natural pure colors with minimum change.

Napure Mirror (In our test)

1 Cross section of the mirror

Conventional silver glass mirror (In our test)

The glass used for the conventional mirrors contains considerable amount of iron to absorb blue light of the incident light and make white color look dull. We have developed "Napure Mirror" made of clear glass with minimum iron content. "Napure Mirror" rarely changes the reflected colors to show natural and pure colors without influence by the glass. Thus "Napure Mirror" is the most suitable for matching the foundation to the colors of your skin and partial makeup. \*The photos show an image of reflection.

Comparison in reflection (in our test)

**Napure Mirror**  
The mirror of ultra-clear plate glass reflects natural and pure colors with minimum change.

**Silver glass mirror**  
The blue light in the incident light is absorbed and many of the reflected colors look dull.

The line of "Napure Mirror" items reflect the natural color of your skin and your beauty. New items are produced one after another responding to the good reputation.
