

Easy-to-carry Foldable and Standable Compact Magnification Mirrors
The magnification mirror magnifies your face to the details and is suitable to care keratin plugs, mottles and wrinkles on your skin.

PROFESSIONAL MODEL MAGNIFICATION MIRROR

[Usage]
 ●At first, move your face close to the magnification mirror and then move away from the mirror to find the focal point you can see clearly reflected image. ●A mirror of greater curvature has shorter focal length, in other words, you can see a clear image nearer to the mirror surface. ●A high-magnification mirror gives vague image outside the focal point. ●Do not look at the magnified image too long. It may cause eyestrain or make you feel sick.
 *Images are magnified in concave mirrors and enlarged more with the increase of their curvature. The magnification of our mirrors is roughly indicated by the radius of curvature (abbreviated as "R") of the mirrors. A magnification mirror having smaller radius of curvature (R) has greater curvature, in other words, reflects a larger image.
 *The magnification mirrors may focus the sun's rays to burn up a combustible material and cause fire. So do not use or store the magnification mirrors under direct sunlight.
 *Magnification mirror without a plain mirror.

PROFESSIONAL MODEL MAGNIFICATION MIRROR 3x 5x

Product name	Item Code.	Suggested retail price	Size	Pattern	JAN	Quantity per carton	Material
