The mirror can be tilted to an angle that is easier for you to see.

10.5 cm adjustable height

Allows you to apply make up at the right posture, without having to peer into the mirror.

Vertical (portrait) position for applying hair color and hair styling

The bottom mirror clearly zooms in on the usually difficult-to-check top of the head section, making it very convenient for applying hair color, dyeing gray hairs, styling hair and applying wigs to this area of the head.

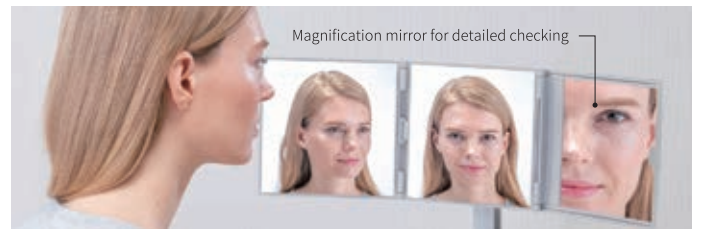

Horizontal (landscape) position for applying hair color to the neckline

The left- and right-side mirrors clearly zoom in on the usually difficult-to-see nape of the neck section, making it convenient for partially dyeing gray hairs on the neckline area.

Horizontal (landscape) position for checking your make up and skin condition

Use the same-size mirrors to check your full-face make up from front and side on, and glance at the side magnifying mirror to check in more detail. You can easily compare how your makeup looks from different angles, so you can carefully check it as many times as you like.
